Standard Services Offered

Small Job (Typically \$50-120, completed day-of)

These are usually "emergency appointments" because something minor has gone wrong (*pad/bumper cork/tenon cork has fallen off, dirty octave vents--water problems*) and you just need the instrument to be in playing condition. If you schedule regular *Standard Cleanings*, you should almost never need this service.

- Correct the immediate issue
- Check adjustments, lubricate mechanism, play test

Standard Cleaning or "COA" (Typically \$400, if scheduled in advance, turnaround time is usually 2-3 business days)

Flute players refer to this as a Clean Oil Adjust. This service is recommended to be done once a year or so to help you avoid last minute emergencies and full overhauls.

- Fully disassemble instrument
- Clean: tenons & receivers, shafts, hinge tubes, posts, tone holes, octave vents, body, bore, etc.
- Remove any noticeable rust from needle & flat springs
- Oil body & bore
- Polish mechanism: posts, hinge tubes, pad cups, touch plates, etc.
- Seal octave vents, replace pads
- Refresh logos
- Inspect bumper corks, replace as needed
- Inspect pads, replace as needed
- Inspect tenon (and bocal) corks, replace as needed
- Reassemble, test each pad for seal & suction; lubricate mechanism
- Refit (swage or countersink) loose keys
- Secure loose adjustment screws
- Check adjustments, play test

Complete Overhaul (Starting at \$900, if scheduled in advance, turnaround time is usually 3-4 business days--if you schedule regular cleanings, you probably won't ever need this)

- Everything listed above in the "Standard Cleaning," and also
- Replace all bumper corks
- Replace all pads
- Replace all tenon (and bocal) corks
